City of San Bruno Sustainability Efforts/Accomplishments

1. **Building Efficiency & Reach Codes:** San Bruno adopted the 2019 CalGreen Building Code, incentivized solar energy permitting, and promoted PG&E energy efficient programs. San Bruno is working on adopting, in 2022, Reach Codes for all-electric new construction and electric vehicle (EV) charging infrastructure. Peninsula Clean Energy and TRC will support the implementation process.
2. **Sustainable Transportation:** The Bayhill Specific Plan recommends that new construction in the Plan Area provide electric space and water heating, or equivalent greenhouse gas (GHG) reductions through new measures, or pay a fee per Mitigation Measure GHG-3. The Plan accommodates the EV charging infrastructure necessary to reduce emissions from the transportation sector and accelerate zero-emission technology. The City's proposed bikeway network is designed to be consistent with the intent of the City's Walk 'n Bike Plan, providing direct and efficient access within and to the Plan Area. New buildings on Bayhill Drive/Euclid Avenue would connect to a Walk 'n Bike Plan facility, with linkage to both Caltrain and BART stations.
3. **Climate Action Plan (CAP):** Staff will receive support from RICAPS and Skyline College's Fellowship Program in drafting the CAP.
4. **Waste Reduction:** San Bruno is amending the Construction & Demolition Ordinance to exceed CalGreen diversion goals and will collaborate with Recology/RethinkWaste for compliance with environmental legislation. San Bruno is considering procuring a Waste Management tracking tool to accurately measure diversion rates.
5. **Next Steps:** Staff will propose Sustainability projects and project timelines at a Spring 2022 Council study session.
